<b>Profile &amp; Introduction</b>	<p>As a marine loading solution supplier, TB Global Technologies has been creating new values by gathering the strengths we have accumulated for more than a half century with more than 6000 sets of worldwide supply record, and putting together the value chain from marketing to development / manufacturing / sales / after-sales services for LNG, Ammonia, LCO2 and LH2. In ADIPEC2025, we exhibit following solutions.</p> <p>1)CHOKUSEN system Automatic connection system for offshore marine loading arms enabling stable, faster and safer loading arm operation</p> <p>2)Bunkering boom for LNG and Ammonia Solution to make ship-to-ship liquefied gas bunkering operation safer and faster For ammonia, special safety functions are applied to neutralize the negative effect of product spillage even under emergency conditions.</p> <p>The world is moving towards an irreversible carbon free society. Awareness of environmental challenges ahead and the aim to realize a decarbonized society will accelerate the energy transition. As a responsible company, TB Global Technologies will be where technology and needs collide, to bridge the gaps, enabling our customers success during this long journey.</p>
